Lantra

Overview in brief

This course will develop your knowledge and increase familiarity with the MegaRail suite of vehicle restraint systems including terminals and transitions, both new and in service supplied by Saferoad.

The finer details

This training course has been developed specifically in relation to Saferoads Megarail vehicle restraint systems and involves classroom learning and a familiarisation walk round of our Lantra approved training school.

The training course will include:

- Product Design, Warranty and Liability
- Containment levels
- Working Width classes
- System progression
- Length of need
- Post installation/ post types.
- Setting out
- Soil testing criteria
- System Drawings
- Theory Assessment.

If successful in meeting the required pass mark in the assessment, Learners will be awarded a certificate of attendance by Lantra which demonstrates the required knowledge to undertake the installation of Saferoads MegaRail products.

Who should attend?

Any companies or individual installers who are intending to install, repair, inspect or maintain Saferoads MegaRail suite of systems.
