

# AQVIS Miljöspont®

## PRESTANDADEKLARATION

Nr: 1501-EN

| 1. Unique identification code of the product type  | AQVIS Miljöspont Standard  |                 |
|--|--|-----------------|
| 2. Intended use  | Road traffic noise reduction device, not for use in circulation areas  |                 |
| 3. Manufacturer  | AQVIS Miljö AB<br>Odavägen 5<br>SE - 599 31 Ödeshög<br>SWEDEN  |                 |
| 4. Authorised representative   | (not applicable)   |                 |
| 5. System of AVCP  | 4  |                 |
| 6. Harmonised standard   | SS-EN 14388:2005   |                 |
| 7. Declared performance  | <p>The resistance to loads related performance are valid for a noise barrier, 2 meters high, supported every 450 mm by steel tubes (330 mm close to the edges). The steel tubes are fixed 1 meter deep in 4-8 mm sorted macadam in corrugated ground tubes (140/160). The dimensions of the steel tubes are 40x40x4 mm. The steel tubes are galvanized S 355 steel fulfilling SS-EN 1461:2009.</p> |                 |
| Essential characteristics  | Performance  | Test method     |
| Sound absorption   | $DL_\alpha = 2$ dB   | EN 1793-1:1997  |
| Sound insulation   | $DL_R = 25$ dB   | EN 1793-2:1997  |
| Self weight  | 400 N/m  | EN 1794-1:2003  |
| Normal (90°) load the barrier can withstand (due to wind, static external and self weight) | 0.46 kN/m  | EN 1794-1:2003  |
| Bending moment at ground level the barrier can withstand (due to snow clearance)           | 3.84 kNm   | EN 1794-1:2003  |
| Normal (90°) load the barrier can withstand (due to snow clearance)                        | 10 kN/2x2 meter  | EN 1794-1:2003  |
| Risk of falling debris   | Class 4  | EN 1794-2:2003  |
| Light reflectivity   | Class 3  | EN 1794-2:2003  |
| Dangerous substances   | None   |                 |
| Durability   | 50 years, no degradation of acoustical properties.   | EN 14389-2:2004 |
